

Anatomy And Physiology Nervous System Packet Answers

05/19/2014
Name: _____
Date: _____
1. The following table lists the major parts of the human nervous system. Match each part with its function.

Brain	<input type="checkbox"/> To receive and interpret information from the rest of the body.
Spinal Cord	<input type="checkbox"/> To carry messages between the brain and the rest of the body.
Peripheral Nerves	<input type="checkbox"/> To carry messages between the brain and the rest of the body.
Sensory Neurons	<input type="checkbox"/> To carry messages from the receptors to the brain.
Motor Neurons	<input type="checkbox"/> To carry messages from the brain to the effectors.
Interneurons	<input type="checkbox"/> To carry messages between sensory and motor neurons.
Receptor Cells	<input type="checkbox"/> To detect changes in the environment.
Effector Cells	<input type="checkbox"/> To respond to messages from the brain.

2. Match each part of the nervous system with its function.

Brain	<input type="checkbox"/> To receive and interpret information from the rest of the body.
Spinal Cord	<input type="checkbox"/> To carry messages between the brain and the rest of the body.
Peripheral Nerves	<input type="checkbox"/> To carry messages between the brain and the rest of the body.
Sensory Neurons	<input type="checkbox"/> To carry messages from the receptors to the brain.
Motor Neurons	<input type="checkbox"/> To carry messages from the brain to the effectors.
Interneurons	<input type="checkbox"/> To carry messages between sensory and motor neurons.
Receptor Cells	<input type="checkbox"/> To detect changes in the environment.
Effector Cells	<input type="checkbox"/> To respond to messages from the brain.

ANATOMY AND PHYSIOLOGY NERVOUS SYSTEM PACKET ANSWERS

anatomy and physiology nervous pdf

With our breakthrough 24x Rapid Learning System™ of smart teaching and rich media, you can now finally gain a powerful learning edge over others who are still struggling with static textbooks and online freebies. Catch up and excel in class with the host of tightly integrated learning modules, designed specifically for today's web and video savvy students and supported by a team of teaching ...

Rapid Learning Center - Anatomy and Physiology

We offer a fully accredited, self-paced Online Anatomy and Physiology course. This course combines an interactive study experience with the convenience of the Internet. This is a self-paced online course that introduces learners with little or no prior knowledge of anatomy & physiology.

Anatomy & Physiology Course Online | Accredited Class

Anatomy (Greek anatomō, "dissection") is the branch of biology concerned with the study of the structure of organisms and their parts. Anatomy is a branch of natural science which deals with the structural organization of living things. It is an old science, having its beginnings in prehistoric times. Anatomy is inherently tied to developmental biology, embryology, comparative anatomy ...

Anatomy - Wikipedia

Anatomy and physiology are the opposite sides of the same biological coin. Anatomy is the study of the body's internal and external structures while physiology studies the function of those structures, both singularly and in conjunction with one another.

Pulmonary valve: Lying at the base of the pulmonary trunk, this valve has three cusps and allows blood to leave the right ventricle while preventing backflow into the ventricular

Anatomy and Physiology of

Sex differences in human physiology are distinctions of physiological characteristics associated with either male or female humans. These can be of several types, including direct and indirect. Direct being the direct result of differences prescribed by the Y-chromosome, and indirect being a characteristic influenced indirectly (e.g. hormonally) by the Y-chromosome.
