Architectural Design and Best Practices Project Final

The software is designed for the architectural programming process. It combines a highly configurable platform with rich data and graphical tools to capture extensive client information, analyze it in interactive views, and create client-ready reports and presentations.

Architectural Programming - Trelligence

An Architectural Programming Process. It is imperative that the major decision-maker—the client-owner—allows participation of all of the stakeholders, or the client-users, who are affected by the design. Experience has shown that client-users' involvement in the programming process results in designs that can be optimized more efficiently.
