assistive technology in the pdf

Assistive technology is an umbrella term that includes assistive, adaptive, and rehabilitative devices for people with disabilities or elderly population while also including the process used in selecting, locating, and using them. People who have disabilities often have difficulty performing activities of daily living (ADLs) independently, or even with assistance.

Assistive technology - Wikipedia

The mission of the new Wisconsin Assistive Technology Initiative Development Team is to assist early intervention agencies, school districts, and their partners to provide assistive technology by making training and technical assistance available through our development of new and updated materials related to the provision of assistive technology tools, and services.
