

Chapter 2 Primary Source Activity Sfponline

CHAPTER 2 Assessment of Primary Data Sources for Truck-Activity Data

CHAPTER 2 OBJECTIVES

- To understand the various sources of truck activity data and how they are used to estimate truck activity.
- To understand the various sources of truck activity data and how they are used to estimate truck activity.

Truck activity is the primary data source for estimating truck activity. The various data sources for truck activity are:

- **Truck Activity Data (TAD)**: This is the most accurate data source for estimating truck activity. It is collected from truck operators and is used to estimate truck activity.
- **Truck Activity Data (TAD)**: This is the most accurate data source for estimating truck activity. It is collected from truck operators and is used to estimate truck activity.
- **Truck Activity Data (TAD)**: This is the most accurate data source for estimating truck activity. It is collected from truck operators and is used to estimate truck activity.
