DATABASE DESIGN APPLICATION DEVELOPMENT AND ADMINISTRATION MICHAEL V MANNINO

database design application development pdf

Database design is the organisation of data according to a database model. The designer determines what data must be stored and how the data elements interrelate. With this information, they can begin to fit the data to the database model.

Database design - Wikipedia

Joint application design (JAD) is a process used in the life cycle area of the dynamic systems development method (DSDM) to collect business requirements while developing new information systems for a company. "The JAD process also includes approaches for enhancing user participation, expediting development, and improving the quality of specifications."
