An eco-city or ecocity is "a human settlement modeled on the self-sustaining resilient structure and function of natural ecosystems", as defined by the Ecocity Builders (a non-profit organization started by Richard Register who first coined the term). Simply put, an eco-city is an ecologically healthy city. The World Bank defines eco-cities as "ecities that enhance the well-being of citizens ...

Smart growth is an urban planning and transportation theory that concentrates growth in compact walkable urban centers to avoid sprawl. It also advocates compact, transit-oriented, walkable, bicycle-friendly land use, including neighborhood schools, complete streets, and mixed-use development with a range of housing choices. The term "smart growth" is particularly used in North America.

### **Smart growth - Wikipedia**

The authors fail to mention the strong correlation (and perhaps causality) between the party affiliation of the cities and states with their economics and growth, NY, Chi and LA staunch Dem, and most of the rest staunch Repub ... perhaps a stronger correlation than for population density or age of the city which the author cites.

### **Houston Risingâ€™Why the Next Great American Cities Arenâ€™t**

Since 2008 to around ~2016 I designed few hundred houses and apartment blocks from personal interest (artistic hobby / training) as well as for various customers all over the world. Designing buildings for other customers turned a bad experience and I earned so little money that made me to retire from architecture and focus on my other business.
