

102

Chapter II The mathematical basis of quantum mechanics 102

A. Chapter II has been revised 102

B. Some new three vectors 102

C. Approximation in the wave equation 102

D. Eigenvalue equation: Characteristic 102

E. The eigenvalue equation of experimental observables 102

F. Some problems of wave optics 102

Complements of chapter II 102

Complement I 102

A. The Dirac delta function 102

B. The Dirac delta function and the Dirac delta function 102

C. Dirac delta function 102

D. Some general properties of the Dirac delta function $\delta(x)$ and $\delta(x^2)$ 102

E. Some general properties of the Dirac delta function $\delta(x)$ and $\delta(x^2)$ 102

F. The Dirac delta function 102

G. An application of the properties of the Dirac delta function: the non-relativistic approximation 102

H. Exercises 102

Chapter III The postulates of quantum mechanics 201

A. Introduction 201

B. Statement of the postulates 201

C. The physical interpretation of the postulates concerning observables and their measurement 201

D. The physical interpretation of the Schrödinger equation 201

E. The superposition principle and physical probabilities 201

Complements of chapter III 201

Complement I 201

A. Some problems of wave optics 201

B. Some problems of wave optics 201

C. Some problems of wave optics 201

D. Some problems of wave optics 201

E. Some problems of wave optics 201

F. Some problems of wave optics 201

G. Some problems of wave optics 201

H. Some problems of wave optics 201

I. Some problems of wave optics 201

J. Some problems of wave optics 201

K. Some problems of wave optics 201

L. Some problems of wave optics 201

M. Some problems of wave optics 201

N. Some problems of wave optics 201

O. Some problems of wave optics 201

P. Some problems of wave optics 201

Fundamentals of Electric Circuits, 5th edition - Kindle edition by Matthew Sadiku, Charles Alexander. Download it once and read it on your Kindle device, PC, phones or tablets. Use features like bookmarks, note taking and highlighting while reading Fundamentals of Electric Circuits, 5th edition.

Fundamentals of Electric Circuits, 5th edition, Matthew

Electricity is the set of physical phenomena associated with the presence and motion of matter that has a property of electric charge. In early days, electricity was considered as being not related to magnetism. Later on, many experimental results and the development of Maxwell's equations indicated that both electricity and magnetism are from a single phenomenon: electromagnetism.

Electricity - Wikipedia

An electrical telegraph is a telegraph that uses electrical signals, usually conveyed via dedicated telecommunication circuit or radio.. The electrical telegraph, or more commonly just telegraph, superseded optical semaphore telegraph systems, thus becoming the first form of electrical telecommunications. In a matter of decades after their creation in the 1830s, electrical telegraph networks ...
