CHEMICAL ENGINEERING AND CHEMICAL PROCESS TECHNOLOGY Vol. 1

Located at the intersection of two major areas of modern chemical engineering—product engineering and process systems engineering—the series bridges theory and practice with the aim of improving the quality of high-value dried products, of saving energy, and of cutting the costs of drying processes.

SAVE Packed With Tools & Information From The Vanguard Of

Processes and Process Engineering 5 CHEMICAL ENGINEERING ACTIVITIES. It is useful to delineate the various activities of a chemical engineer, from the conception of a project to its final implementation. Companies will assign a variety of job titles to these activities.

Fermentation, chemical process by which molecules such as glucose are broken down anaerobically. More broadly, fermentation is the foaming that occurs during the manufacture of wine and beer, a process at least 10,000 years old. The frothing results from the evolution of carbon dioxide gas, though this was not recognized until the 17th century. French chemist and microbiologist Louis Pasteur in ...

Abstract. About 97 % of the chlorine and nearly 100% of the caustic soda in the world are produced electrolytically from sodium chloride, while the rest of the chlorine is manufactured by the electrolysis of KCl , HCl , chlorides of Ti and Mg , and by the chemical oxidation of chlorides []. The electrolytic technologies currently used are mercury, diaphragm, and ion-exchange membrane cells.

The Fischer-Tropsch process is a collection of chemical reactions that converts a mixture of carbon monoxide and hydrogen into liquid hydrocarbons. These reactions occur in the presence of metal catalysts , typically at temperatures of 150-300 °C (302-572 °F) and pressures of one to several tens of

atmospheres.

The Haber process, also called the Haberâ€™Bosch process, is an artificial nitrogen fixation process and is the main industrial procedure for the production of ammonia today. [2] [3] It is named after its inventors, the German chemists Fritz Haber and Carl Bosch , who developed it in the first decade of the 20th century.
