

## Chapter 2

### Financial Reporting and Analysis

#### REVIEW

Financial statements are the most visible products of a company's financial reporting process. They provide information about a company's financial performance and position. They are used by investors, creditors, and other stakeholders to make decisions about the company. The financial statements are prepared by the company's management and audited by independent auditors. The financial statements are prepared in accordance with the Generally Accepted Accounting Principles (GAAP).

### financial statement analysis 10 pdf

Financial statements (or financial reports) are formal records of the financial activities and position of a business, person, or other entity.. Relevant financial information is presented in a structured manner and in a form which is easy to understand. They typically include four basic financial statements accompanied by a management discussion and analysis:
