The de Broglieâ€™Bohm theory, also known as the pilot wave theory, Bohmian mechanics, Bohm's interpretation, and the causal interpretation, is an interpretation of quantum mechanics. In addition to a wavefunction on the space of all possible configurations, it also postulates an actual configuration that exists even when unobserved. The evolution over time of the configuration (that is, the ...

A normal mode of an oscillating system is a pattern of motion in which all parts of the system move sinusoidally with the same frequency and with a fixed phase relation. The free motion described by the normal modes takes place at the fixed frequencies. These fixed frequencies of the normal modes of a system are known as its natural frequencies or resonant frequencies.

Il papiro, fatto di materiale spesso simile alla carta che si ottiene tessendo insieme gli steli della pianta di papiro, poi battendolo con un attrezzo simile al martello, veniva utilizzato in Egitto per scrivere, forse già durante la Prima dinastia, anche se la prima prova proviene dai libri contabili del re Neferirkara Kakai della V dinastia egizia (circa 2400 a.C.).

Il primo principio della termodinamica, anche detto, per estensione, legge di conservazione dell'energia, è un assunto fondamentale della teoria della termodinamica. Il primo principio della termodinamica rappresenta una formulazione del principio di conservazione dell'energia e afferma che: «L'energia interna di un sistema termodinamico isolato è costante.»
