Semantic features represent the basic conceptual components of meaning for any lexical item. An individual semantic feature constitutes one component of a word's intension, which is the inherent sense or concept evoked. Linguistic meaning of a word is proposed to arise from contrasts and significant differences with other words.

In syntactic analysis, a constituent is a word or a group of words that functions as a single unit within a hierarchical structure. The constituent structure of sentences is identified using tests for constituents. These tests manipulate some portion of a sentence and based on the result, clues are delivered about the constituent structure of the sentence.

Definição. Línguas naturais são, grosso modo, o contrário de línguas artificiais ou construídas, como linguagens de programação de computador, assim como de sistemas de comunicação existentes na natureza, como a dança das abelhas. Embora exista uma grande variedade de línguas naturais, qualquer criança humana normal é capaz de aprender qualquer língua natural. [2]
