Carbon (from Latin: carbo "coal") is a chemical element with symbol C and atomic number 6. It is nonmetallic and tetravalent—making four electrons available to form covalent chemical bonds. It belongs to group 14 of the periodic table. Three isotopes occur naturally, 12 C and 13 C being stable, while 14 C is a radionuclide, decaying with a half-life of about 5,730 years.

# Global Carbon Fiber Market 2017 Industry Research Report

**Global Carbon Fiber Market Research & Forecast to 2022**

Global Carbon Fiber Market Research & Forecast to 2022 provides a comprehensive analysis of the global carbon fiber market. The report covers the market size, growth rate, and forecast from 2017 to 2022. It also includes a detailed analysis of the market structure, key players, and competitive landscape. The report is available in PDF format and can be downloaded for free.

**Report of the Research**

Global Carbon Fiber Market Research & Forecast to 2022 provides a comprehensive analysis of the global carbon fiber market. The report covers the market size, growth rate, and forecast from 2017 to 2022. It also includes a detailed analysis of the market structure, key players, and competitive landscape. The report is available in PDF format and can be downloaded for free.

**Market Research by Manufacturers, Key Companies**

Global Carbon Fiber Market Research & Forecast to 2022 provides a comprehensive analysis of the global carbon fiber market. The report covers the market size, growth rate, and forecast from 2017 to 2022. It also includes a detailed analysis of the market structure, key players, and competitive landscape. The report is available in PDF format and can be downloaded for free.

**Market Research by Type**

Global Carbon Fiber Market Research & Forecast to 2022 provides a comprehensive analysis of the global carbon fiber market. The report covers the market size, growth rate, and forecast from 2017 to 2022. It also includes a detailed analysis of the market structure, key players, and competitive landscape. The report is available in PDF format and can be downloaded for free.

How much plastic is produced each year worldwide? This statistic depicts the global plastic production from 1950 to 2016. In 2016, global plastic production was around 335 million metric tons.
