

- finalize and release simulation core (April/May)
 - core APIs
- ns-3.1 complete release (June timeframe)
 - add Internet and Device models
 - add validation framework
 - some higher-level topology/scenario APIs

SIMULATION AND IMPLEMENTATION OF NETWORK TOPOLOGY USING NS2

Fig. 1 illustrates the research method adopted in this study to determine the efficacy of Het-Net in supporting CVT applications. Field tests and simulation experiments using ns-3 were conducted to answer the research questions and learn about integration challenges of Het-Net for CVT applications that ensures the optimal utilization of available communication options (i.e., eliminate the need ...
