RESEARCH IN NEW IONIC LIQUIDS

research in new ionic pdf

An air ioniser (or negative ion generator or Chizhevsky's chandelier) is a device that uses high voltage to ionise (electrically charge) air molecules. Negative ions, or anions, are particles with one or more extra electron, conferring a net negative charge to the particle. Cations are positive ions missing one or more electrons, resulting in a net positive charge.

Air ioniser - Wikipedia

A wetting agent that increase coverage and penetration of any herbicide. CONTAINS: 80% non-ionic Surfactant. USE: With almost all herbicide sprays including Trimec, Atrazine, Brush Killer and 2, 4-D Amine FOR: Reducing the surface tension of water to insure more uniform coverage and penetration of weed killers.

Southern Ag Surfactant for Herbicides Non-Ionic, 16oz, 1 Pint

American interest in "gravity control propulsion research" intensified during the early 1950s. Literature from that period used the terms anti-gravity, anti-gravitation, baricentric, counterbary, electrogravitics (eGrav), G-projects, gravitics, gravity control, and gravity propulsion.
