Very sadly, Dr David Lucy died on Wednesday 20 June 2018. David was perhaps best known in the forensic science community for his work on statistical models for the calculation of likelihood ratios, including his work with Prof Colin Aitken on multivariate kernel density models, and for his 2005 book Introduction to Statistics for Forensic Scientists.

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

Notice in the above picture how all 4 trades were profitable. However, notice how much of the profit was lost. With some optimization that I will explain in this post, the system can be much more profitable and let fewer

portions of the profits slip away.
