Planning and designing library buildings and services. Books, journal articles and online resources on key aspects of library planning, service design, design and building, and designing for inclusion.

Designing Libraries - Planning and designing library

Ventilation is the intentional introduction of ambient air into a space and is mainly used to control indoor air quality by diluting and displacing indoor pollutants; it can also be used for purposes of thermal comfort or dehumidification. The correct introduction of ambient air will help to achieve desired indoor comfort levels although the measure of an ideal comfort level varies from ...

Parkour (French:) is a training discipline using movement that developed from military obstacle course training. Practitioners aim to get from one point to another in a complex environment, without assistive equipment and in the fastest and most efficient way possible.

Parkour - Wikipedia

My earliest electronics projects and my first robot were powered by regular alkaline batteries, and I didn't think about current or the capacity of those batteries. The batteries were prominently labeled "1.5V", and I was happy in my understanding that putting four in a battery holder got me to 6 volts; when the motors
